# WHY CHOOSE CP-CARRILLO?

*In the high pressure world of motorsports, some of the top names rely on CP-Carrillo to meet their needs. Here are a few reasons why.*

## RESEARCH AND DEVELOPMENT

CP-Carrillo is backed by some of the brightest minds in the industry. This core group allows us to explore angles not possible using conventional methods. By enlisting the latest in cutting edge software, CP-Carrillo packages together creativity, experience and proven technology to bring you the best parts for your application. Our commitment to excellence continues to advance as the industry changes. This commitment has resulted in more forgings specific to certain applications, proprietary treated tooling and fixturing manufactured only for CP-Carrillo. Each of these aspects has been put through stringent research and development stages to ensure that our product will exceed your standards.

## 3D MODELING

Each forging is designed using an advanced 3D modeling software package and is qualified through a rigorous Finite Element Analysis entity. 3D modeling enables CP-Carrillo to check thicknesses and weights before manufacturing allowing us to produce the strongest and lightest part for your application.

## QUALITY

CP-Carrillo has developed proprietary tooling, dedicated cutters and unconventional fixtures to ensure that each piston is produced to the highest quality. Our 5-axis machining techniques allow us to create any piston while our computerized electronic inspection equipment makes sure we manufacture parts to the tightest industry tolerances.

## CUSTOMER SERVICE

CP-Carrillo is backed by a staff with over 100 years of experience. Our staff is committed to your success through technical support and account maintenance. All of our sales staff are equipped with comprehensive information from piston specs to applications, and are committed to grow our business in a positive and professional manner so that your business can do the same.

## AT CP-Carrillo, ALL PISTONS ARE CREATED EQUAL

Whether you are a professional racer or a weekend warrior, CP-Carrillo prides itself on giving you the best part possible for your applications. All pistons at CP-Carrillo are put through a demanding quality control system and precise computerized machining, ensuring that your piston is the best piston available.

## EXPOSURE

Along with a variety of trade shows CP-Carrillo attends each year, we continually promote our product through magazine articles and advertisements featured in top industry publications. Furthermore, many of the top names in motorsports proudly run our products and display CP-Carrillo decals on their race vehicles. We will continue to promote our product in a positive way so that your business will thrive.

## PISTONS & RODS

### The Game Has Changed

#### No longer does low cost mean low quality

CP-Carrillo is proud to introduce a new product division; Bullet Pistons. As the economy continues to change, CP-Carrillo strives to stay current as the industry shifts to new directions. The Bullet Piston series is another step in this process and incorporates everything that has made CP the industry leader. Inspired by top forms of motorsports, the Bullet Piston was conceived as a high quality product at a reasonable price. Extensive research, development and newly designed forgings along with centralized manufacturing cells have enabled CP to accomplish this goal and pass the savings on to our customers. Our restructured profit margins allow you to stay competitive and us to offer a superior product while maintaining our core philosophy, to make the best part available for your application- Bullet Pistons!

### What Makes This Possible

Many people know that CP-Carrillo continues to be the leader in the high performance piston market. What people may not know is that CP is home to one of the most advanced, state of the art piston manufacturing facilities in the world. Our facility and capabilities are second to none in this respect and this new division of CP-Carrillo is a perfect fit into an already advanced system. So what makes this possible?

- Centralized manufacturing cells
- Application specific forgings and hardware
- Larger production runs
- Available off the shelf
- Same machines and tooling as CP
- **USA MADE**

### What Does This Mean For You

This means added savings for you and your customers without compromising your reputation. CP-Carrillo has built a strong name for itself in every form of motorsports and with the introduction of this new division, CP can now offer you some of the highest quality pistons at a very affordable price.

## PROJECT X (PART NUMBERS STARTING WITH MX)

After two years of development, CP-Carrillo has expanded its X-forging technology from its custom racing piston program and introduced Project X Pistons: Off-the-shelf fully boxed pistons for a variety of street bike and Powersports applications including Honda, Yamaha, Suzuki, Kawasaki, KTM and others. CP-Carrillo pistons are fully boxed forgings designed to minimize friction and reduce weight without compromising piston strength. CP-Carrillo adjusts the weight balance between the high and low areas of the piston during the forging process, and incorporates bracing and ribs for near unbeatable strength. The inherent design of CP-Carrillo Piston X forgings allow for the use of a shorter pin, which increases strength and overall lightness of the assembly.

### PROJECT X PISTON LINE FEATURES:

- **Leading edge racing piston technology available off-the-shelf**
- **Fully boxed-style forging for ultimate strength, durability and power**
- **Reconfigured piston skirt designs maximize power and reduce piston rocking**
- **Coated skirts limit the amount of friction on the skirt/acts as buffer between piston and cylinder wall**
- **Double-pin oilers engineered in conjunction with broached oilers to deliver twice the amount of oil to the pin**
- **Internal windows allow additional oil to flow to pin**
- **Top of line DLC Pins offer a high resistance to wear which extends the service life and reliability under extreme conditions.**

As with everything at CP-Carrillo, these pistons have been thoroughly developed and tested in extreme applications. The result is a state of the art piston using the latest in technology that was once only offered to the higher echelons of motorsports. All Project X pistons are available off the shelf and are listed throughout the catalog for your application.

**A-** External bracing minimizes piston deformation to maintain maximum ring support to deliver more power.

**B-** Internal bracing strengthens the part in the most critical area: the pin bore. This bracing maximizes durability while decreasing friction in the pin assembly.

**C-** Internal windows allow excess oil to reach the wrist pin. These windows along with CP-Carrillo standard double pin oilers promote longer life and more useable horsepower.

**D-** Wider skirt faces and redesigned profiles are engineered for stability, power and durability. All Project "X" pistons come standard with skirt coating which reduces friction, which in turn reduces heat. (Coating not shown)

## CPK/CPKX KITS

With the current state of the economy, it is important that everyone gets the most out of their money. CP-Carrillo understands this, and this is why we created our CPK and CPKX kits. These drop in kits include our piston as well as a top end gasket kit from Cometic. The added value that goes with these kits doesn't just stop at the price, but instead goes all the way to convenience. These kits are not only cheaper than if you were to buy the components separately, but also allows you the distributor, dealer or racer to make one phone call, pay one shipping charge and inventory one item to meet your needs. For more information, call CP-Carrillo today and we will explain how these kits can simplify your world.

## PLATINUM KITS

The Platinum Kits will completely transform your bike/quad without breaking the bank. These one of a kind, class legal kits have been redesigned to use smaller wrist pins and longer rods to give you a lightweight assembly and allowing you to get the most out your engine without changing the displacement of the motor. All of our Platinum Kits feature the Project X technology in our pistons while including DLC Pins, Cometic EST top end gaskets and a redesigned Carrillo connecting rod. These kits have been highly successful and feature some of the best kept secrets in the industry. Call CP-Carrillo today and ask how these kits can help you.

# TERMS AND CONDITIONS

## Payment Options

We accept Cashiers Check, Company Check (Upon Approval), Visa and Master Card and AMEX. Initial custom orders require a 50% deposit prior to order processing. Acceptable methods of payment for international orders may be made by credit card or by wire transfer. Please ask your sales representative for details. All orders will be charged the applicable sales tax, unless a completed resale card is submitted and on file. A \$30 fee will be charged for each returned check. A 1.5% per month finance charge will apply for all balances over 30 days.

## Shipping

Shelf orders are normally shipped same day via United Parcel Service if submitted by 2:00 PM Pacific Standard Time. Next Day Air, 2nd Day, 3 Day Select and ground service are available. Customer assumes responsibility for all freight charges. All Drop shipments will incur a \$10.00 fee. An additional \$10.00 charge will be added for all non-UPS International shipments.

## Return Policy

All returns are subject to a 15% restocking fee. Returns must be made within 90 days and in new unused condition. All returns require a Return Merchandise Authorization (RMA) number. We will only accept returns purchased directly from CP-Carrillo with the original invoice number and date for each item returned for credit. Custom parts or orders are not returnable.

## Notice

Due to the nature of high performance applications, CP-Carrillo products are sold without warranty of merchantability or fitness or purpose, express or implied. CP-Carrillo shall not under any circumstances, be liable for any special, incidental, or consequential damages, including, but not limited to, damages or loss of other property of equipment, loss of profits or revenue, cost of purchased or replaced goods, or claims of customers of the purchaser which may arise and/or result from the sales, installation or use of these parts". CP-Carrillo reserves the right to make product improvements/changes without notice and without incurring liability with respect to similar products previously manufactured.

## Guarantee

Technological advances are constantly made in the high performance engine business; many components that are adequate today will be outdated and unacceptable tomorrow. For this reason, we at CP-Carrillo are continually testing our products to assure our customers that we offer the highest quality products. CP-Carrillo's enviable reputation in the industry has led competitors throughout the world to copy our design. Watch for counterfeits. These imitations do not employ our sophisticated methods of certification and inspection. Consequently, these parts cannot approach the high quality component that CP-Carrillo produces. Our obligation to the high performance engine business is that only the finest quality materials, workmanship and inspection procedures are documented and accepted. This is our guarantee to you, our customer.

## Engine Assembly & Modification

We guarantee the quality of the steel and aluminum, the forging, the heat treat process, and the dimensional sizes. We have no control over the assembly or customer modification of our parts in the engine. There are no further guarantees either expressed or implied by CP-Carrillo or any of their agents or representatives. CP-Carrillo reserves the right to alter the design or initiate product changes without incurring liability or obligation with respect to similar products previously manufactured by this concern.
